

The overlapping star then shifts the energy from the last point to yet another point.

CLOSE UP OF MAN WHO CURATED THE SHOW STANDING AWAY FROM EVERYONE IN THE CORNER.

A beautiful woman in a friendly manner goes up to the man congratulating him and gesturing at all the work done in amazement. He starts smiling and changes to a brighter tone. She gestures, as if she has to leave, but gives him her card and a big hug before leaving.

GAMEMASTER (CONT'D)

The waters of love and community then, in turn, feeds the woods of self-emotion while holding the feelings of belongingness. It's fulfilling a position within a community through nurturing.

The energy accumulated from the 4th point of the star transitions to the 5th point, illuminating it in a new color.

GAMEMASTER (CONT'D)

The woods of self-realization then fuels the fires of Spirit's passion to become self-actualized. At this point, you are at the top of the hierarchy of needs and desires.

The man, now excited, goes to a nearby easel he previously set up and turns on the light to a blank canvas.

GAMEMASTER (CONT'D)

Those fires of creativity and passion that have started burning within again from the touch of spirit... then creates new earth...

As the man is painting quickly, the overflow of building energy makes it full circle back to the first point upon the star. It lights up again as the entire circumference begins to glow.

GAMEMASTER (CONT'D)

...like lava building rock and dirt. From the burning fires within, new earth forms, the cycle of creation begins again. Earth shaping minds to carry the forth love and community that fill and grow our sense of belonging...

(MORE)

GAMEMASTER (CONT'D)
 which fuels the fires of passion
 that manifest the new creations
 that better the world.

ZOOMING BACK OUT FROM THE CENTER OF THE STAR AS THE SCENE
 DISAPPEARS AND WE RETURN TO THE SHOP.

GAMEMASTER HOLDING THE STAR.

THETA
 So that's a game?

GAMEMASTER
 Well, that's more of a natural
 flow, the game part of this order
 system happens when the flow of
 direction shifts and the quantity
 of each element is altered.

5TH POINT OF STAR SENDING ILLUMINATED ENERGY TO THE 2ND POINT
 IN A STRAIGHT LINE THROUGH THE STAR.

GAMEMASTER (CONT'D)
 Will someone of fiery passion melt
 a cold hard unfeeling metal mind
 with the passion?

Using color, the silver light from the second point reverses
 the flow, as it diminishes the yellow of the fire.

GAMEMASTER (CONT'D)
 Or will a structured mind be able
 to create a safe container to keep
 the fires of passion from spreading
 too wildly... potentially burning
 someone, creating chaos, and
 eventually burning out?

The second point then retreats the energy and shoots it to
 the fourth point with silver.

GAMEMASTER (CONT'D)
 How do measure when something is a
 threat and either too much or too
 deficient? Will the sharp metal
 mind cut through the overgrown
 thicket of knotted wood emotions...

The direction of flow reverses and the green shoots and takes
 over the second point.

GAMEMASTER (CONT'D)
 ...or will the twisting emotions
 dull the sharpness of a mind.

The star returns to a normal state with energy flowing in all directions of the star and circumference.

GAMEMASTER (CONT'D)
 And so the game goes on. There are
 20 total relationships formed from
 the 5 elements. 25 if you include
 the 6th and central element which
 stabilizes the others.

BOTH THETA AND GAMEMASTER AT THE COUNTER.

THETA
 And this game is everlasting?

GAMEMASTER
 The design is supposed to be a
 peaceful game, but most people
 aren't even aware that it exists
 and so they retreat into chaos.
 Peace is supposed to be an active
 motion in every interaction. Every
 interaction has always and will
 always abide by this system, at
 least in this dimension. The
 problems arise when you layer in
 the quantifiers and leave out the
 6th element.

STAR IS ILLUMINATING AND SPEEDING UP VERY QUICKLY AS IT SEEMS
 TO BE GETTING UNSTABLE FROM TOO MUCH BUILDING UP.

The center begins to illuminate pulling energy from each of
 the 5 points. As it does, it gets slower and more stable.

GAMEMASTER (CONT'D)
 The 6th element is carbon, it is
 the central core that can bring
 each of the elements into stillness
 and unity. It's in all the 5
 elements like a diamond in the
 rough. In music, it's the
 diminished 5th that makes up the
 7th chord of a major scale.
 Stillness... quiet... traveling
 within. It is dire to caking the
 chaos.
